

# GSH 600-700

## Heavy duty granulators

- Knives are adjusted outside of the machine
- Specially developed deflector wedge
- Wide choice of rotors
- Well thought out housing design
- Strong Welded Steel construction
- Oversized outboard bearings

The easily removable deflector wedge acts as a third stator blade and can be used to adjust the aggressiveness of the rotor at the first cutting point.

### Applications

The wide range of rotors and hopper styles allow the GSH machines to be tailored to almost every application in the plastic recycling field. The GSH 600 and 700 granulators are mainly used as large central granulators for in-house recycling applications to process large thick-walled parts in one step or as a second step granulator after a shredder to reach higher throughput rates. For abrasive, contaminated or highly filled materials the machines can be equipped with special wear protections, such as hard facing of the rotor and housing and key parts manufactured from highly wear resistant steels.

The GSH granulators are available with different rotor options to fit different applications, all rotors feature the V-cut technology creating a high quality regrind.

### General Description

The heavy duty granulators of the GSH 600 and 700 series offer a wide array of different rotor designs with widths ranging from 800 mm to 1000 mm with a diameter of 600 and 700 mm. The completely welded heavy steel construction is designed to withstand the most demanding and universal applications. Rotor bearings, knife mounts and rotor shaft are oversized.

The standard V-cut creates a high quality regrind with a very low percentage of fines in the output material. The removable third stator blade is acting as a deflector wedge and allows the machine to be quickly adjusted to different application scenarios. Other standard features include easily replaceable wear plates in the cutting chamber as well as outboard bearings reducing the risk of contamination.

The heavy duty bearings are separated from the cutting chamber to avoid lubricants entering the cutting chamber and bearing failure due to material contamination in the bearings.

### Technical Specifications and Dimensions

#### Model

Rotor diameter (mm)	600	600	700
Rotor width (mm)	800	1600	1000
Drive capacity (kW)	75	132	90
Rotor knife (rows)	5 or 7	5 or 7	5 or 7 or 9
Stator blade (rows)	2 or 3	2 or 3	2 or 3
Screen size (mm)	>6	>6	>8
Effective working area (mm)	790 x 695	1500 x	900 x 800
Weight approx (kg)	4500	6950	7100

#### 600/800

A (mm)	2350
B (mm)	2220
C (mm)	1000
D (mm)	1940
E (mm)	788
F (mm)	1270
G (mm)	1820

#### 600/1600

A (mm)	2535
B (mm)	2390
C (mm)	1000
D (mm)	1940
E (mm)	1560
F (mm)	1980
G (mm)	2360

#### 700/1000

A (mm)	2830
B (mm)	2550
C (mm)	1100
D (mm)	2250
E (mm)	985
F (mm)	1290
G (mm)	2060
